

Real Estate

The Mann Made real estate team has many years of experience in the structuring of real estate transactions in the UK and overseas.

The use of corporate structuring for holding UK real estate, utilising both onshore and offshore vehicles, has risen significantly over the last few years and with ongoing changes in UK legislation, it has never been more important to work with business partners who are at the forefront of innovative tax solutions. Mann Made is that business partner.

We have extensive experience in advising on real estate transactions and creating the necessary structures to hold real estate, whether it be commercial, residential, development or buy to let. We are able to offer a tailored range of services to facilitate the management of new holding structures. Existing structures need constant review, a service which our skilled staff offer. We are also able to deal with all the necessary tax filing and, where appropriate, manage Construction Industry Scheme (CIS) obligations in-house.

Our services include :

- Tax and structuring advice
- VAT services
- Company, Trust, Fund and Partnership formation, management and Trustee services
- Tax computations and filings
- Accounting and book-keeping
- CIS registration and compliance

Our friendly team will assist you with any queries from small to complex.
